

Acknowledgement

To Super Lord "The Infinitely Powerful" who enlightens and inspires the truth seekers to work nicely for attainment of truth and body of knowledge yielding progress, peace and eternal joys. As I opine, it is the "Omniscient" who blessed me with courage, patience, discretion, will-power and accordingly working efficiency to complete this Ph.D. dissertation within the stipulated period.

It gives me immense pleasure in expressing my sincere gratitude to Dr. R. B. Ram, Professor, Department of Applied Plant Science (Horticulture), BBAU, Lucknow for his proper guidance, congenial discussion and encouragement during the preparation of this manuscript.

I express my heartiest and loyal thanks to Dr. Deepa H. Dwivedi, Professor & Head Department of Applied Plant Science (Horticulture), BBAU, Lucknow for her invaluable help, able advice, encouragement and also providing me the necessary facilities during the research programme.

It is my privilege to express my profound gratitude to Dr. Sanjay Kumar, Professor, Dr. M. L. Meena, Assistant Professor & Dr. Sutanu Maji, Assistant Professor, Department of Applied Plant Science (Horticulture), BBAU, Lucknow for providing me due support during the course of the study.

No emotion can ever be enough to express my love and regards to my parents and sister for their unconditional love, firm faith and moral support that always enlightened me to follow up a righteous path in my life to achieve the goal. They have been a constant source of inspiration to me and so this work is especially dedicated to them. My heartfelt thanks to my wife for her tremendous and motivational support at every stage because of which it became possible for me to achieve the maximum in the shortest time span.

I gratefully acknowledge the UGC for providing fellowship during the course of investigation.

I would also like to thank my colleague Mr. Neeraj Kumar, Ph.D. Scholar for his nice company and the help he provided to me while working in the experimental field and departmental laboratory. I express my cordial feelings for his hearty love, co-operation and affection during the Ph.D. programme. I would also like to remember all Ph.D. scholars of the department especially Shreesh, Pawan, Vikas, Sandeep, Shashank, Pushkar, Madhvendra who directly or indirectly gave me encouragement, help and humorous company at BBAU, Lucknow during the research work.

I am also thankful to all departmental staff members especially Mr. Vinay Kumar, Office Assistant and Mrs. Anita Tiwari, Laboratory Assistant, Department of Applied Plant Science (Horticulture), BBAU for their help to me time to time. I also extend my thanks to all the persons whose name any how missed to mention here, but they provided me the needed help which made it possible to fulfill this intended task.

List of Tables

Table No.	Title	Page No.
3.1	Monthly meteorological data (average) recorded during the course of investigation (2013- 14 and 2014-15)	28
3.2	Details of experimental layout	29
Table No.	Title	After Page No.
4.1	Analysis of variance for different characters of strawberry (pooled data of two years)	35
4.2	Range (Minimum and maximum), mean, phenotypic coefficient of variation, genotypic coefficient of variation, heritability, genetic advance and genetic advance for 17 characters in strawberry (pooled data of two years)	37
4.3	Genotypic correlation coefficient for 17 characters in strawberry genotypes (pooled data of two years)	40
4.4	Phenotypic correlation coefficient for 17 characters in strawberry genotypes (pooled data of two years)	41
4.5	Direct (Diagonal) and indirect effects of different traits contributing to yield in strawberry (Genotypic level) (pooled data of two years)	45
4.6	Direct (Diagonal) and indirect effects of different traits contributing to yield in strawberry (Phenotypic level) (pooled data of two years)	49
4.7	Per cent contribution of different characters of the total divergence in Strawberry genotypes (pooled data of two years)	50
4.8	Grouping of strawberry genotypes based on D^2 Values (pooled data of two years)	50
4.9	Average intra and inter cluster D^2 and D values of strawberry genotypes (pooled data of two years)	50
4.10	Cluster mean values for 17 characters in strawberry genotypes (pooled data of two years)	50
4.11	Growth flowering and fruiting performance of strawberry cultivars (pooled data of two years)	52
4.12	Fruiting and yield performance of strawberry cultivars (pooled data of two years)	53
4.13	Qualitative performance of strawberry cultivars (pooled data of two years)	54
4.14	Sensory panel scores for skin colour, flavour, taste, texture and juiciness of strawberry (pooled data of two years)	55

List of Figures

Figure No.	Title	After Page No.
3.1	Monthly meteorological data (average) recorded during the course of investigation (2013- 14 and 2014-15)	28
3.2	Layout plan of experimental field	29
4.1	Vegetative growth performance of strawberry cultivars	52
4.2	Fruiting performance of strawberry cultivars	53
4.3	Yield performance of strawberry cultivars	53
4.4	Quality (TSS, titratable acidity, reducing sugar and total sugars) performance of strawberry cultivars	54
4.5	Quality (ascorbic acid) performance of strawberry cultivars	54
4.6	Overall acceptability (Sensory evaluation) of strawberry fruits of different genotypes	55

List of Plates

Plate No.	Description	After Page No.
1	Collection of strawberry runners of different genotypes from Uttarakhand and Delhi	29
2	Strawberry runners of different genotypes	29
3	Field preparation of experimental plot during 2013-14 and 2014-15	30
4	Field view of research trial (2013-14 and 2014-15)	30
5	Observations recorded on various physical and bio-chemical parameters of different strawberry genotypes	32
6	Strawberry fruits of different genotypes for organoleptic test (Sensory evaluation) An overview of strawberry fruits of different genotypes	33
7	Organoleptic test (sensory evaluation) of strawberry fruits of different genotypes	33
8	A general view of fruits of different strawberry genotypes	35

LIST OF ABBREVIATIONS

⁰ Brix	Degree Brix
C.D.	Critical difference
Cv.	Cultivar
D.F.	Degrees of freedom
Duch.	Duchesne
e.g.	<i>Exempli gratia</i> ; for example
<i>et al.</i>	<i>et alii</i> (masculine), <i>et aliae</i> (feminine); and others
GA	Genetic advance
GAM %	Genetic advance as per cent of mean
GCV	Genotypic coefficient of variance
H ²	Heritability in broad sense
h ²	Heritability in narrow sense
HPO ₃	Metamorphic acid
i.e.	<i>id est</i> ; that is
I.U.	International unit
IC	Indigenous collection
MS	Mean square
NaOH	Sodium hydroxide
PCV	Phenotypic coefficient of variance
RBD	Randomized block design
SS	Sum of squares
SE m±	Standard error of mean
TSS	Total soluble solids
