

Acknowledgements

I do not find words to express my sense of gratitude to my supervisor Prof. Manish K. Verma. He was kind and patient to the extent of letting me have an unrestricted claim upon his time. He gave his valuable suggestions in all the stages of work. Without his sustained guidance the research work would have remained an abstraction. I express my gratitude to all the teachers of my department who helped me at different stages of this work. My thanks are also due to office assistant of the department Mr. Ajay Kumar, the librarians and the members of staff of the libraries of Lucknow University and Babasaheb Bhimrao Ambedkar University, Lucknow for their help and cooperation in collecting the necessary material for this work.

I am also indebted to my friends whose constant encouragement enabled me to complete the task in time. My special gratitude goes to my mother, father, husband and brother who have been a constant source of inspiration and without whose encouragement and motivation this thesis would not have been completed.

I dedicate this thesis with all humility and love to my grandfather Late Dr. K.C. Datta, a doctor who devoted his entire life towards the medical profession.

Finally, I bow in reverence to the Almighty whose constant and benign blessings led my endeavour to fructify.
