

Kind attention to all the faculties of BBAU

BBAU-IRINS (<https://bbau.irins.org/>) is web-based Research Information Management service for BBAU. The scholarly publications and academic activities of BBAU faculties have been collected in the portal from academic identities. The portal is integrated with academic identity of faculties such as ScopusID, ORCID ID, Research ID, etc. for ingesting the scholarly publication and other information. The portal shows information about faculty profiles including H-Index, publications, expertise, experience, qualification, awards, projects, patents, citation etc. The research output at department level and University level may be browsed on the portal. The service is developed in collaboration between Gautam Buddha Central Library and Information & Library Network (INFLIBNET) Centre.

All the faculties are requested to update information regarding their publications (except SCOPUS data) and academic activities in their personal ORCID-ID. The BBAU.IRINS portal will fetch the data from ORCID-ID and update on the portal. The portal is also linked with the BBAU website and Library website.
